The City of Karratha is collecting personal information through the Annual Community Survey to understand community views about City services, facilities, liveability and local priorities, and to support planning, decision-making and service improvement.

If you are under 18 years of age, please ask your parent or legal guardian for permission before participating in this survey.

Participation in the survey is voluntary. You may choose not to answer any question unless it is required to progress through the survey.

If you choose to enter the prize draw, the City will collect your name and contact details solely to administer the draw and contact winners. Prize draw information will be managed separately from survey responses where reasonably practicable and will not be used for marketing or promotional purposes.

The survey is hosted by SurveyMonkey a third-party service provider engaged by the City. Information submitted through the survey may be stored, processed or accessed outside Australia.

Personal information may also be accessed by authorised City employees involved in administering, analysing and reporting on the survey, and will only be used or disclosed for survey-related purposes or where required or authorised by law.

Survey results may be published in aggregated or de-identified form, and individuals will not be identified where reasonably practicable.

Information provided to the City of Karratha may also be subject to the Freedom of Information Act 1992 (WA).

For more information about our privacy practices, please refer to the City's Privacy Policy and Privacy Statement.

☐ I acknowledge that I have read and understood this Collection Notice and consent to the collection, use and disclosure of my personal information as described above. If I am under 18 years of age, I have discussed my participation with a parent or legal guardian.
